

Introduction

The Food Express Delivery Platform is a Java Swing and MySQL database application designed to support customers, restaurants, delivery drivers, and administrators within a food delivery system. The GUI allows users to interact directly with the database through different stakeholder dashboards.

Customer Dashboard

Vendor ID	Restaurant Name	Category
1	Burger Bros.	Burgers
2	Taco Teleport	Mexican
3	Pizza People	Pizza

Stakeholder:

Customer

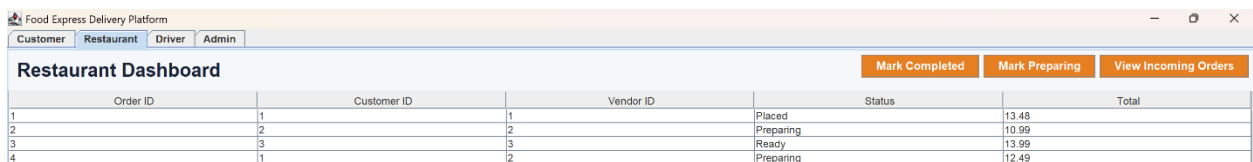

Actions:

- Browse Restaurants
- View Selected Menu
- Place Order

Description:

Customers can browse restaurants, load menu items for a selected restaurant, and place food orders. When an order is placed, the application creates a new order, stores the order items, and assigns a delivery record in the database.

Restaurant Dashboard

Order ID	Customer ID	Vendor ID	Status	Total
1	1	1	Placed	13.48
2	2	2	Preparing	10.99
3	3	3	Ready	13.99
4	1	2	Preparing	12.49

Stakeholder:

Restaurant / Vendor

Actions:

- View Incoming Orders

- Update order status

Description:

Restaurants can view incoming customer orders and update order statuses using “Mark Preparing” and “Mark Completed.” These changes are updated directly in the MySQL database.

Driver Dashboard

Food Express Delivery Platform							
Customer Restaurant Driver Admin							
Driver Dashboard				Mark Delivered Mark Picked Up View Assigned Deliveries			
Delivery ID	Order ID	Driver ID	Status	Assigned At	Delivered At		
1	1	1	Assigned	2026-05-10 21:47:04			
2	2	2	Picked Up	2026-05-10 21:47:04			
3	3	3	Picked Up	2026-05-10 21:47:04			
4	4	1	Assigned	2026-05-10 21:49:03			

Stakeholder:

Delivery Driver

Actions:

- View Assigned Deliveries
- Update delivery status

Description:

Drivers can view assigned deliveries and update delivery statuses using “Mark Picked Up” and “Mark Delivered.” Delivery updates are reflected live in the database.

Admin Dashboard

Food Express Delivery Platform					
Customer Restaurant Driver Admin					
Admin Dashboard				Delete Selected Order	View Orders View Vendors View Customers
Order ID	Customer ID	Vendor ID	Status	Total	
1	1	1	Placed	13.48	
2	2	2	Preparing	10.99	
3	3	3	Ready	13.99	
4	1	2	Preparing	12.49	

Stakeholder:

Platform Administrator

Actions:

- View Customers
- View Vendors

- View Orders
- Delete Selected Order

Description:

Administrators can monitor customer, vendor, and order information through the admin dashboard. The administrator can also delete orders from the system.
